

# SWATCOM1

## Push-to-Talk Radio Accessory

The SWATCOM 1 (Modular Accessory PTT ) can be configured to attach to virtually any portable two-way radio. The SWATCOM 1 is intrinsically safe, totally waterproof and dust tight. The unique TALKING HEADSETS accessory quick release allows the PTT to be attached to any of the SWATCOM communication devices. This adaptability allows the same system to be tailored to a specific user workplace environment or operational needs

# SWATCOM1

## Push-to-Talk Radio Accessory

Units are available in either standard 'clicking' switch (with tactile feedback) or silent switch operation. Standard features include rugged, watertight enclosure, sealed cable glands and strain reliefs, 360 degree swivel Belt clip, remote PTT connection point (see Velcro or Ring switch).

From explosive atmospheres to high noise, facemasks, protective suits and beyond the SWATCOM 1 is part of the most flexible, adaptable and unique radio accessory solution on the market today.

Switch guard is also available

\*The SC1 CANNOT be ordered without a separate Radio Interface Cable

### Primary Options

\*All options connect to the SC1 via a 'Quick Release Cable' allowing for rapid attachment and detachment from the unit.

### Secondary Options

\*The SWATCOM 1 also allows for connectivity with two types of remote Push-to-Talk; the SWATCOM 16 Velcro Switch and the SWATCOM 17 Ring Switch (both shown right). This further adds to the versatility of the SWATCOM 1 making it an excellent add-on to your portable radio for a wide range of applications.
